

## Applications for underground tank CARAT S

Detention tank

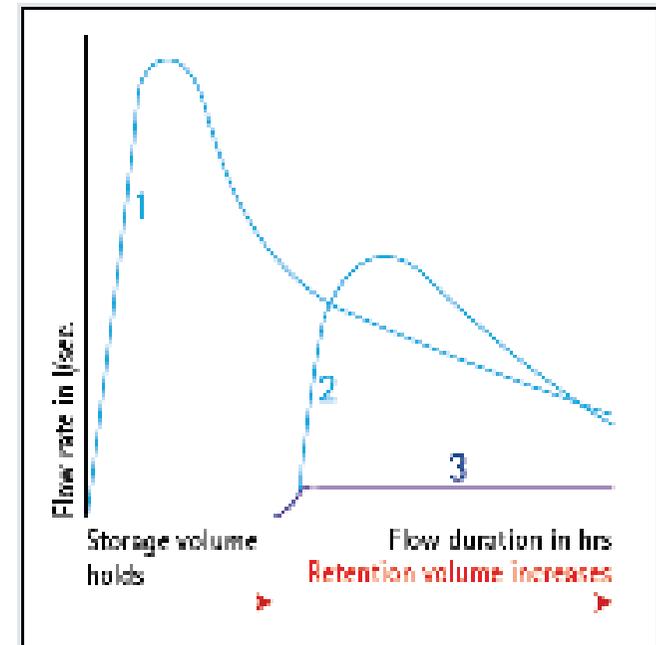

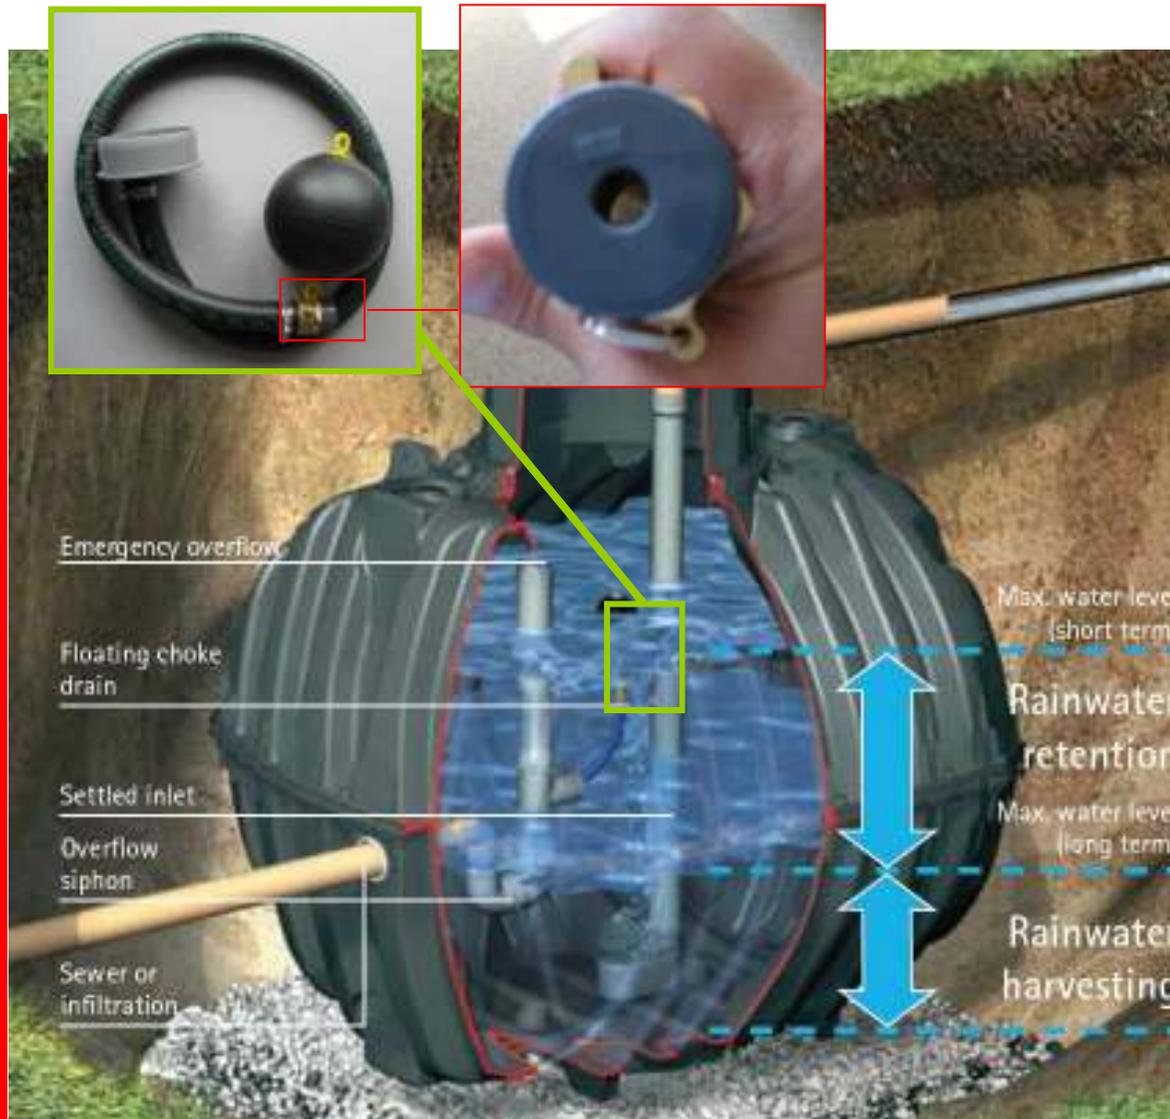

- Controlled outlet through retention (0,05 l/sec.- 2,0 l/sec.)
- Supports municipal sewer system at stormwater
- Reduce the fee for the municipal sewer system
- In combination with large scale reservoirs also for industrial objects available

# Applications for underground tank CARAT S

## Retention tank

1. Normal rainwater drain (without retention)
  2. Rainwater drain with reservoir and reduced drain without float
  3. Rainwater drain with reservoir and floating drain choke = constant flow
- This special type of rainwater harvesting is prescribed or subsidised by many local authorities.
